

Resources for Mathematics in the Early Years

Young Children articles and NAEYC books and resources

Baker, I., & M.B. Schiffer. 2007. The Reading Chair: All interest areas need books, so spread those books around. *Young Children* 62 (3): 44–49. www.journal.naeyc.org/btj/200705

Bankauskas, D. 2000. Teaching chess to young children. *Young Children* 55 (4): 33–34.

Baroody, A.J. 2000. Research in Review. Does mathematics instruction for three- to five-year-olds really make sense? *Young Children* 55 (4): 61–67.

Chalufour, I., & K. Worth. 2004. *Building structures with young children: Trainer's guide*. St. Paul, MN: Redleaf. Available from NAEYC.

Copley, J.V. 2000. *The young child and mathematics*. Washington, DC: NAEYC; Reston, VA: National Council of Teachers of Mathematics.

Copley, J.V. 2004. *Showcasing mathematics for the young child: Activities for three-, four-, and five-year-olds*. Washington, DC: NAEYC; Reston, VA: National Council of Teachers of Mathematics.

Copple, C., & S. Bredekamp. 2009. *Developmentally appropriate practice in early childhood programs serving children from birth through age 8*. 3rd ed. Washington, DC: NAEYC.

Cutler, K.M., D. Gilkerson, S. Parrott, & M.T. Bowne. 2003. Developing math games based on children's literature. *Young Children* 58 (1): 22–27.

Dickinson, P. 2003. Choosing books you can count on. Beyond the Journal—*Young Children* on the Web. www.journal.naeyc.org/btj/200301

Geist, E. 2001. Children are born mathematicians: Promoting the construction of early mathematical concepts in children under five. *Young Children* 56 (4): 12–19.

Geist, E. 2003. Infants and toddlers exploring mathematics. *Young Children* 58 (1): 10–12.

Geist, E. 2003. Links to online math resources. Beyond the Journal—*Young Children* on the Web. www.journal.naeyc.org/btj/200301

Geist, K., & E.A. Geist. 2008. Do re mi, 1-2-3: That's how easy math can be—Using music to support emergent mathematics. *Young Children* 63 (2): 20–25.

Golbeck, S.L. 2005. Research in Review: Building foundations for spatial literacy in early childhood. *Young Children* 60 (6): 72–83.

Guha, S. 2002. Integrating mathematics for young children through play. *Young Children* 57 (3): 90–92.

Online resources

- AAA Math**—Divided into categories by topic, this Web site explores different mathematical themes and offers practice problems. A Spanish version of the site is available. www.aaamath.com
- The Building Blocks**—Looking to base children's mathematical skills in their current activities, the Building Blocks program offers a curriculum and resources that support children's natural interests and experiences. www.gse.buffalo.edu/org/buildingblocks
- Developing Educational Standards**—Learn the math standards for every state from this list. www.edstandards.org/stsu/math.html
- Equals**—The Equals and Family Math program from UC Berkeley's Lawrence Hall of Science provides workshops and lesson materials for math and equity. They have links to related sites throughout the U.S. and activities in Spanish. <http://lawrencehallofscience.org/equals/index.html>
- Figure This!**—Created by the National Council of Teachers of Mathematics, Figure This! has lots of resources for families and teachers. The math index lists different topics and then provides several related problems to be solved. Much of the site is available in Spanish. www.figurethis.org
- FunBrain**—This Web site offers games for kids and resources for parents and teachers. There are lots of games focusing on different concepts and links to other math sites. www.funbrain.com/numbers.html
- The Math Forum at Drexel**—A forum out of Drexel University, teachers and families can use this site to ask questions, work on problems and puzzles, talk with others in discussion groups, and subscribe to a weekly newsletter. The Math Forum Library includes an introduction to different mathematical topics. <http://mathforum.org/index.html> and <http://mathforum.org/library/levels/elem1>
- Math Perspectives**—This Web site supports math educators through resources, strategies, and assessments as they provide solid mathematics foundations for their students. The group offers a range of professional development services, along with resources for the classroom. www.mathperspectives.com/index.html
- National Council of Teachers of Mathematics**—NCTM publishes the magazine *Teaching Children Mathematics*, *On-Math*, an online journal, and *Illuminations*, a resource site for teachers with activities and lessons. They offer numerous resources for teachers and families. www.nctm.org
- National Library of Virtual Manipulatives**—This site makes available, at no charge, interactive Web-based virtual manipulatives for math instruction, K–12. www.nlvm.usu.edu/en/nav/vLibrary.html
