

Final Project

Select one of the final projects and submit your work to your instructor.

Achievement Based Objective:

Assess professional development needs and conduct research to increase knowledge in identified area.

Responsive Caregiving:

Research responsive caregiving and write a one page summary of this approach for families. Implement one of the examples of responsive caregiving in your program and provide a summary of what you did and the response from children, peers, and families.

Children with Special Needs:

Based upon your interests and the needs of the children in your program, identify a special need that you will research and write a 2-3 page paper summarizing the disability and how you can support this child in your program by offering (and list) Supportive Learning Experiences.

Professional Development:

Design a training for fellow professionals on using the Infant and Toddler ELG in programs. Provide your instructor with an outline of your training.

Dual Language Learners:

Research dual language learners and design an action plan (with a visual web and writing down) including steps you will take to enrich your environment, inform and collaborate with parents on the value of dual language learners, and strategies on educating others to support dual language learners.
