Grazing (continued)

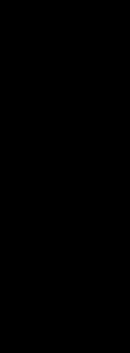

- Ingestion Rate: amount of food passing through the gut per unit time
 - Units of chl, C or N
- Filtration rates are related to food concentration

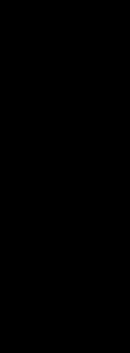

Efficiency Example

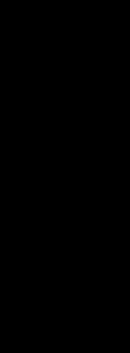

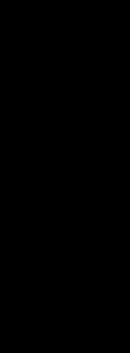

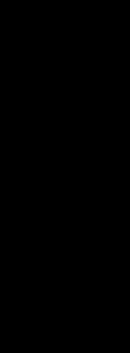

Diel

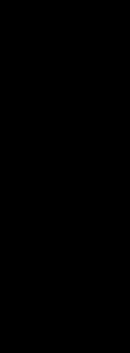

- Copepods: increased feeding at night
- Tunicates: may or may not be diel

Egestion: Fecal pellet production

- Release of solid material
 - High 7-17 C:N
 - Copepods: surround/Toby peritrophic membrane

Comparison between Copepods and Tunicates
