

## Moving Forward

Take a minute to reflect back on module two. In this module we

1. Identify key milestones in language development from birth to 33 months.
2. Identify key learning experiences to support children’s expressive and receptive language skills, social skills, and language knowledge.
3. Identify appropriate emergent pre-reading and writing skills; and
4. Select appropriate literature for children birth to 33 months of age.

Now reflect on your current practice. Based on the information presented in this module **identify how you will apply new knowledge** to your practice. Develop an action plan. Your action plan should **describe what you learned** through this module or class readings, a brief **reflection on your current practice**, and describe how you intend to **apply this new knowledge to your practice** with young children. Be as specific and detailed as possible. What will you do? What strategies will you use? **How will you evaluate your own success?**

Identify how you will apply new knowledge:	
Describe what you learned	
Reflect on current practice	
Describe how you will apply new knowledge	
How will you evaluate your success
